

PRETEC creative series Innovative new ideas for USB sticks

PRETEC's whole new series of individually and creatively designed USB 2.0 sticks don't just make perfect products for the fancy good industry, the Creative Series models are also the ideal IT retail add-ons.

Taipei/Soest 8 June 2006 – With its PRETEC Creative Series product family, **PRETEC Electronics Corp.**, the company that introduced the smallest USB 2.0 stick in the world, the i-Disk Diamond in 2005, will present a number of innovative, stylish and cutting edge USB stick solutions at the 2006 Computex (Hall 4, Booth T202B). These patented solutions are not only great gifts and fashion accessories, they are the perfect solution for IT and consumer electronics retail add-on sales.

The i-Disk Sports series, for example, which includes an American football, a basketball, a baseball and, of course, a football, is the ideal present for sports fans even when the World Cup is not on.

When it comes to lifestyle products, PRETEC has a wide range of options for modern data transmission including its Smart Pen, the Bullet Proof and other USB sticks that come as earrings, necklaces, key chains and many other designs.

For the first time at Computex 2006 PRETEC, will present its i-Disk Bullet Proof, whose robust design not only defies mechanical problems but is also waterproof and fireproof and hence more than deserves the name "bullet proof".

PRETEC consistently relies on CU Flash technology in its products so that it can offer state-of-the-art performance along with a handy and versatile format. The dependable and robust USB 2.0 sticks read data at speeds of up to 12 MB/s and write data to the stick at speeds of up to 8 MB/s. This represents a data transmission rate of 80x. In addition, the sticks also have additional functions for data protection and fast data transmission.

About PRETEC:

PRETEC Electronics Corp. is one of the leading manufacturers of USB 2.0 sticks and Flash cards. As one of the pioneers in Flash media, PRETEC has been setting groundbreaking trends and new milestones in **storage capacity** (first manufacturer with 8 GB CompactFlash cards), **speed** (first manufacturer with 266x speed for USB memory sticks) and **size** (manufacturer of the i-Disk Tiny, the smallest USB memory stick in the world) since 1993 through innovative research and development

News Release

(more than 100 patents have been applied for or already granted).

PRETEC is currently setting new standards with the **first 4 GB 133x SD and 266x MMCplus cards in the world**. Other products, such as accessories for their Flash solutions, complete PRETEC's product portfolio.

Since 2004, PRETEC has had a presence on the European market with its PRETEC Europe GmbH office. PRETEC is thus in the position to provide its European customers with the on-site service and support it is known for and its products are readily available thanks to its own warehouse.
